

## ...THE SR CONSTRUCTION WAY

THE SR TEAM EMBRACES THE TENETS AND PHILOSOPHIES OF LEAN CONSTRUCTION, CREATING A HARMONIOUS ATMOSPHERE OF SAFETY, PRODUCTIVITY, TEAMWORK AND WORKFLOW. WE...

- **RESPECT** all individuals, avoiding unused or underutilized talent, creativity, intellect, skills and potential
- **REVIEW** every expenditure of resource to ensure it generates value
- **OPERATE** with "pull planning," directly engaging field foreman and those knowledgeable of activity requirements and durations to actively participate in planning sessions to adjust course in real-time based on constraints and opportunities; this is opposite of the typical approach of establishing a rigid environment and pushing unwilling participants towards the finish line

### LEAN CONSTRUCTION MINIMIZES WASTE OF:

- Time
- Resources
- Movement
- Human potential

### LEAN CONSTRUCTION MAXIMIZES VALUE:

- Respect for all individuals involved by recognizing and using their talents, ensuring their commitment and accountability
- Optimize the whole via continuous improvement, removal of waste, generation of value and focus on process and flow

### LEAN CONSTRUCTION CREATES SUPERIOR RESULTS AND FINAL OUTCOMES:

- Better time productivity
- Reduced safety hazards
- Cost savings at all levels
- Projects delivered reliably, on time and within budget
